Local Contact for registration and information	Prof. Dr. Nagy Katalin symposiumszegeged@regio10.hu katalin.nagy@universityszeged.com

Course 1

Course title	Soft tissue augmentation procedures around implants in aesthetic sites
Abstract / Learning objectives	<p>Natural and harmonious results around dental implants located in the esthetic zone are calls for preservation and sometimes the reconstruction of the soft tissue.</p> <p>Effective surgical techniques for soft tissue management around implants in the esthetic zone have been developed and should be implemented in every clinician's treatment spectrum. The need for augmentation should be analyzed before every intervention and it may also be necessary to augment soft tissue at multiple steps during the course of implant therapy, so that the procedures are subsequently combined.</p> <p>This lecture will present:</p> <ul style="list-style-type: none">• How to create or preserve soft tissue around implants in esthetic zone• How to analyze the reconstruction of the soft tissue
Speaker	Cem Yildiz

FDI CE Programme 2020 - Europe

Speaker bio

Dr N. Cem Yildiz graduated from Gazi University, Faculty of Dentistry in 2001. He made his doctorate study on “The Effects of Different Surgical Methods Applied to Gingiva on The Elimination of Melanin Pigmentation” and graduated his PhD program in 2007 at Gazi Faculty of Dentistry, Department of Periodontology.
