

# Standing Committee Nomination Form 2024

X First Nomination  Nomination for re-election

This nomination is for:  
(tick one box only) PLEASE USE **ONE FORM PER NOMINATION**

- Membership Liaison and Support Committee  Dental Practice Committee  
 Education Committee  Science Committee  
X Public Health Committee

## DOCUMENTATION REQUIRED

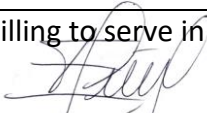

**Written presentation from the Nominee in English** (Maximum 350 words for Standing Committees)

X Included

**Curriculum Vitae (CV) / personal record in English in a Word format**

X Included

## NOMINEE'S INFORMATION

Title: Doctor
Name: Rolando Enrique Peñaloza Quintero
Address: Carrera 7, 40 – 62, Edificio Pablo VI, Instituto de Salud Pública, Pontificia Universidad Javeriana, Bogotá, Colombia
Member Association: Federación Odontológica Colombiana
The nominee declares that he/she is willing to serve in this position X Yes <b>Signature</b> 

**NOMINATING ASSOCIATION/ORGANIZATION'S INFORMATION**

Name of the Association/Organization Federación Odontológica Colombiana
Name of Official representing this Association/Organisation (President/NLO/President-elect). The Nominee may not nominate himself/herself. Maria Fernanda Atuesta
Position of Official President FOC
Signature 

To be eligible for election to a standing committee, nominees should meet the specific criteria for each committee listed below. Please tick the boxes below if the corresponding criteria are met.

**Membership Liaison and Support Committee**

- Able to communicate effectively in English, verbally and in documents
- Documented knowledge and experience of working within a national or international organization
- Documented knowledge and experience in promotion of health policies of writing, printing and/or publishing
- Networking and communication skills
- A successful candidate evaluation results (only in case of nomination for re-elections)

**Dental Practice Committee**

- Able to communicate effectively in English, verbally and in writing
- Documented knowledge and experience of clinical dental practice
- Experience in the management of projects related to dental practice
- Knowledge in areas relevant to the practice of dentistry, such as dental and professional legislation, ethics, practice management, working within a dental team, education, community oral health, etc...
- Experience in policy formulation, management and advocacy in the field of dental practice
- A successful candidate evaluation results (in case of nomination for re-elections)

### Education Committee

- Able to communicate effectively in English, verbally and in writing
- Documented knowledge and experience in organising continuing education programmes for dental practitioners, lecturing experience, and knowledge of educational and training methods
- A record of attendance/participation of international dental congresses
- Contacts (network) of internationally renowned dental scientists and speakers
- A successful candidate evaluation results (in case of nomination for re-elections)

**Science Committee Note:** *for Science Committee, a mix of members with expertise from different areas is important. There is currently a requirement for candidates with experience in the fields of oral pathology / oral medicine, gerodontology / general dentistry and periodontology.*

- Able to communicate effectively in English verbally and in writing
- Post-graduate scientific qualifications
- A substantial record of publications in scientific journals especially dental
- Experience in the management of scientific projects
- Knowledge of the principles and practice of evidence-based dentistry
- Contacts (network) of internationally renowned dental scientists
- A successful candidate evaluation results (in case of nomination for re-elections)

### Public Health Committee

**A post-graduate** academic qualification in dental public health or preventive and community dentistry is **an asset**. Please tick this box if applicable

- Able to communicate effectively in English, verbally and in writing
- Documented knowledge and work experience in dental public health c.q. oral health promotion and disease prevention
- In depth knowledge and documented experience relevant to areas of dental public health, such as disease prevention, fluorides, oral cancer, tobacco, nutrition, disease risk factors and health promoting behavioural aspects, community oral health etc.
- Documented experience in aspects of oral health development projects, such as developing, implementing, managing and evaluating these projects
- Experience in the development, implementation and evaluation of community-based projects and programs, including awareness, education and promotion, for different types of population.

- Experience in epidemiology or public health research
- Contacts (network) of internationally renowned dental scientists or key health decision makers
- A successful candidate evaluation results (in case of nomination for re-elections)

**CLOSING DATES FOR NOMINATIONS FOR STANDING COMMITTEES: 3 June 2024**

This form must be signed and returned **preferably by email** to:

Ms Djerdana (Gina) Ivosevic at [divosevic@fdiworlddental.org](mailto:divosevic@fdiworlddental.org)  
with copy to Ms Maria Kramarenko [mkramarenko@fdiworlddental.org](mailto:mkramarenko@fdiworlddental.org)  
or **by fax** at +41 (0)22 560 8140

Rolando Enrique Peñaloza Quintero

Dear members of the Selection Committee,

I am writing to you in order to express my interest in being part of the Public Health Committee of the International Dental Federation. My experience in public health, along with my passion for improving the quality of life in our community, drives me to run for this prestigious committee.

I am a Dentist, with more than 30 years of experience in the design, implementation and evaluation of public health policies. Throughout my career, I have worked on various projects focused on population health, which has allowed me to acquire a deep understanding of the challenges and opportunities in the field of public health.

Some of the achievements that I consider relevant to this candidacy include:

For six years I directed the Institute of Public Health at the Javeriana University, one of the largest universities in Colombia.

I led the IV national oral health study (2016), in which we were able to study the main oral health problems in Colombia and the understanding of the determinants that affect the health of the populations.

I participated as technical director of the National Health Survey (2007) and as a researcher in the National Mental Health Survey (2015).

We carried out a diagnosis and proposed an oral health model for Bogotá, a city with more than seven million people, where both the issues of financing, the service model and the city's oral health care management model were addressed.

I am convinced that my knowledge and experience can significantly contribute to the Public Health Committee of FDI. I am committed to working collaboratively with other committee members to identify and address the most pressing health issues in our area of expertise. My goal is to promote evidence-based initiatives that have a positive and lasting impact on public health.

Attached to this letter you will find my curriculum vitae, where you can find more details about my professional and academic career. I thank you in advance for considering my candidacy and remain at your disposal for any additional information you may require.

## **COLOMBIAN DENTAL FEDERATION**

Bogotá DC May 27, 2024

Sirs  
International Dental Federation  
FDI

Best regard.

The Colombian Dental Federation (FOC), as a union and scientific entity, as an Ordinary Member of the FDI, is pleased to present Dr. Rolando Enrique Peñaloza as a candidate for the Public Health Committee of the FDI.

Dr. Peñaloza is a Dentist with more than 30 years of experience in the field of public health. He is a Professor at the Pontificia Universidad Javeriana, Specialist in Health Management with an emphasis on Social Security, Specialist in Social Policy, Master in Political Studies from the Universidad Javeriana and Doctor in Political Studies from the Universidad Externado de Colombia.

Throughout his professional career, Dr. Peñaloza has demonstrated a deep commitment to the professional and professional improvement of Oral Health at a National and International level. He has been a prominent leader in the promotion of oral health in vulnerable populations and has actively participated in various projects and programs related to public health.

Dr. Peñaloza is an Active Member of the Colombian Dental Federation and has been a constant collaborator in the organization of events, courses and workshops, Leader in the OHO Colombia Second Phase Project, recognized Speaker and has published numerous articles in specialized scientific journals.

*Headquarters: Calle 93 No. 11-39*

*Tels: 236 14 14 - 218 49 25*

*Fax: 2184984*

*E-mail: [info@federacionodontologiacolombiana.org](mailto:info@federacionodontologiacolombiana.org)*

*Bogotá, DC Colombia*

## **COLOMBIAN DENTAL FEDERATION**

We are convinced that Dr. Peñaloza has the necessary skills, experience and commitment to make a valuable contribution to the FDI Public Health Committee. His deep knowledge and hard work with oral health promotion make him an ideal candidate for this position.

We have high expectations of his management and we trust that he will be able to further strengthen the relations between the Colombian Dental Federation and the FDI.

We thank the FDI for the opportunity to present Dr. Rolando Enrique Peñaloza as a candidate for the Public Health Committee.

We attach CV for more information.

Without further ado, I subscribe.

Cordially,

  
**MAURICIO GARCIA HURTADO**  
Executive Director  
Colombian Dental Federation

## BIOGRAPHICAL SKETCH

---

NAME: Rolando Enrique Peñaloza Quintero

---

POSITION TITLE: Head Professor at the Pontificia Universidad Javeriana

---

### EDUCATION/TRAINING

---

INSTITUTION AND LOCATION	DEGREE	Completion Date MM/YYYY	FIELD OF STUDY
Pontificia Universidad Javeriana, Bogotá, Colombia	D.D.S.	12/1989	Oral Health
Pontificia Universidad Javeriana, Bogotá, Colombia	Post-Grad Diploma	05/1993	Management of Health Services
Pontificia Universidad Javeriana, Bogotá, Colombia	Post-Grad Diploma	04/1999	Social Politics
Pontificia Universidad Javeriana, Bogotá, Colombia	M.SC.	04/2002	Political Studies
Universidad Externado de Colombia, Bogotá, Colombia	Ph.D.	09/2017	Political Studies

### A. Personal Statement

I have extensive experience mentoring students and junior faculty across several institutions in Colombia during my academic career at the Pontificia Universidad Javeriana (PUJ), Colombia. I am also a visiting Professor of several universities in Colombia and Latin America. My research focuses on the intersections between political science, economics and public health, to improve or maintain the health conditions of populations. In coordination with interdisciplinary research groups, I have developed a research program in different Colombian territories with the participation of researchers from the United States of America, Germany and Spain. For more than 30 years, I have been working on the preparation and coordination of research and consulting projects in public protection policies, especially in the following areas: Research on public policies and financing of health services, which allowed analysis in the formulation, implementation and evaluation of the health sector. Evaluation of health policies in terms of structure, processes and results with application of analysis methodologies in: Health service delivery system (installed capacity, organization and financing); Population at risk (predisposition, capacities and needs); Environment (social and economic); access made (utilization and satisfaction); Health risks (environment and behavior): effectiveness, equity, efficiency, production and allocation. The research work that has an interdisciplinary approach that includes health, environment, ethnic studies, among other areas of knowledge. I have skills and competences in mixed methods (qualitative-quantitative). I have also received training in impact assessment, disease burden estimation and road safety. The research program at the Institute of Public Health at the PUJ has been built on the accumulated capacities and experiences in the generation of public health knowledge over the years and is a flexible scenario to respond to the emerging needs arising from social transformation.

2008 -	Member The European Evaluation Society
2012 -	Member Colombian Association of Health Economics
2015 -	Member of the International Society on Priorities in Health
2020 -	Member of the Health Systems Global

### **Honors**

2018	Head professor, Pontificia Universidad Javeriana
------	--

## **C. Contributions to Science**

1. Throughout my career, I have made a variety of contributions as principal researcher and co-researcher that have sought to take a comprehensive look at the current operation of the inspection, surveillance and control system for the General Health Security System in Colombia, carrying out models and studies that provide information on the supply and demand of health services, characterize the conditions that impact on the health of the Colombian population and comprehensively approach the processes of social determinants of health in order to provide updated information that contributes to the design of policies, plans and projects. Based on these results that have been used as inputs for the General System of Social Security in Health and used by several key actors in society, some advances and major challenges were addressed that will contribute to the goals and achievements established in the framework of the Ten-Year Public Health Plan.

  - d. Rodríguez, J., Ruiz, F., Peñaloza, E., Eslava, J., Gómez, L. C., Sánchez, H., ... & Botiva, Y. (2009). National health survey 2007. Bogotá: Javegraf.

2. In addition to the contributions above, I have also participated as a principal and co-researcher in burden of disease studies which are a great alternative to the usual morbidity and mortality studies, the identification of risk factors for communicable diseases, because in addition to setting priorities for health services (both preventive and treatment) and establishing research priorities, they identify disadvantaged groups to guide cost-effective health interventions, enable evaluation and planning of sector interventions, plans and programs. The results of burden of disease studies have been used by governmental and non-governmental agencies to set priorities for research, development, policy and funding for health investment. In terms of extreme maternal morbidity and mortality, this is a public health priority in Colombia, not only because it is a determinant of the level of development achieved in the country and is included in the millennium goals and objectives, but also because it has been considered as such in the technical and regulatory developments of the national public health policy adopted in Colombia in recent years.

#### D. Additional Information: Research Support and/or Scholastic Performance

## **Ongoing Research Support**

SIAP00009741 Peñaloza Quintero (PI) 08/15/2022 – 02/14/2024  
Title: Elder-friendly cities and communities: the case of Colombian and Spanish cities  
Main Goal: To identify the state of friendliness with older adults in two Colombian cities (Manizales and Bogota) and two Spanish cities (San Juan de Alicante and Algorfa), according to the postulates of the Vancouver protocol of the World Health Organization.

SIAP00009755 Peñaloza Quintero (PI) 01/01/2021 – 12/31/2026  
Title: Strengthening Agency & Learning across Health Systems in the Americas  
Main Goal: To become the Latin American hub for health systems and policy research through the development and implementation of a comprehensive postgraduate study program (that includes specializations, masters, and doctorates) that is built on high-quality, policy-oriented research on health policy and systems, and trains male and female young researchers, policy & decision makers, and leaders of civil society through innovative approaches to teaching and harnessing technology to decentralize learning and provide quality education within Colombia and across all of Latin America and the Caribbean in order to help the region on its way to achieving universal health coverage.  
Role: PI

SIAP00009162 Rodriguez (PI) 12/01/2020 – 12/15/2021  
Title: Promotion of Vehicle Safety Standards for Colombia  
Main Goal: Identify the effect of the adoption and implementation of Vehicle Safety Standards in Colombia.  
Role: Co-I

10544 Peñaloza Quintero (PI) 09/01/2020 – 09/30/2021  
Title: Recommendations to promote adjustments or improvements aimed at having a sustainable and preventive health system in Colombia, focused on the human being, from the personal and professional dimensions, which aims to improve access, timeliness and quality in the provision of health services.  
Main Goal: Generate interdisciplinary and inter-institutional discussions between the UNIVERSIDAD JAVERIANA, SURA and other relevant actors in the different areas that are conducive and relevant to the object of the study, aimed at identifying the main problems that limit and impact the health system, the review of national and international literature from the different associated disciplines, and the proposal of recommendations aimed at overcoming them.  
Role: PI

SIAP00009155 Torres-Quintero (PI) 03/01/2020 – 09/30/2021  
Title: Evaluation of mechanisms to implement population-based health surveys through mobile phones.  
Phase II  
Main Goal: Adapt and assess the feasibility, quality and validity of using MPS in NCD risk factor surveys.  
Role: Co-Investigator

SIAP663 Rodriguez (PI) 03/01/2019 – 08/21/2021  
Title: Epidemiological Study to Identify Associations between Environmental Factors and the Health of Resident Persons in the Area of Influence of Coal Mining Operations Developed in the Central Zone of the Department of Cesar.  
Main Goal: Establish the association that may exist between personal risk factors (socio-demographic, genetic, lifestyle and personal history), access to health services, intra-household and environmental and environmental (including the mining operation), and the respiratory and skin health status of the communities in the area of influence of the mining operation in central Cesar.  
Role: Co-Investigator

SIAP00008066 Cubillos (PI) 01/31/2018 – 02/28/2022  
Title: Program to strengthen the capacities of the staff of the health secretariats of Guajira, Cesar and Bogotá, to improve aspects related to mental health management for victims of the armed conflict.

Main Goal: Adapt a program to strengthen the capacities of the staff of the health secretariats of Guajira, Cesar and Bogotá in order to improve aspects related to mental health care and management for victims of the armed conflict.

Role: Co-Investigator

SIAP539 Peñaloza Quintero (PI) 01/31/2018 – 02/28/2022

Title: Explore association between the respiratory health of the communities and the proximity to the mining and port operations of Cerrejon, taking into account other risk factors.

Main Goal: To establish the association that may exist between the respiratory health status of the study communities and their proximity to the Cerrejon mining operation, as well as the effect of other personal risk factors, access to health services, the intra-household and extra-household environment on people's health.

Role: PI

### **Completed Research Support**

SIAP755 Peñaloza Quintero (PI) 08/28/2020 – 12/15/2020

Title: Provide professional services to the ministry of health and social protection in relevant technical aspects COVID-19

Main Goal: Support the Colombian Ministry of Health and Social Protection in the review and definition of technical aspects, based on national and international evidence, on initiatives to respond to the COVID-19 pandemic and that serve for the structuring and implementation of public health policies.

Role: PI

SIAP00007647 Peñaloza Quintero (PI) 04/19/2017 – 04/18/2020

Title: Creation of a Regional Program for the Strategic Management of Epidemiological Emergencies for vector-borne diseases.

Main Goal: Design, cost and implement a regional program of strategic management of epidemiological emergencies for vector-borne diseases in five Andean countries: Bolivia, Colombia, Chile, Ecuador and Peru.

Role: PI

SIAP00007729 Rodriguez (PI) 10/01/2017 – 06/30/2019

Title: Bloomberg initiative to improve vital statistics and make better use of information on Health in Colombia.

Main Goal: Develop and evaluate strategies in different processes of the civil registration and vital statistics system using information and communication technologies aimed at improving the quality and coverage of vital statistics and the use of health information in Colombia.

Role: Co-Investigator

SIAP00007440 Matallana (PI) 08/14/2017 – 03/05/2018

Title: Design and costing of the Integral Model of Health Care MIAS de Boyacá.

Main Goal: Build the pre-design of the Integrated Health Care Model MIAS adapted for the Department of Boyacá, with the budget for the implementation and operation of the Care Model, and following the guidelines defined by the Ministry of Health and Social Protection.

Role: Co-Investigator

SIAP00005437 Peñaloza Quintero (PI) 10/04/2013 – 03/03/2018

Title: Development and evaluation of an integrated model for the inspection, surveillance and control of timely access, adequate use and quality in the provision of services in the Colombian SGSSS.

Main Goal: Generate evidence and develop a model for strengthening the inspection, surveillance and control of the General Health Security System in Colombia.

Role: PI
