Motivation Letter 2024 - Dr Kivanç Bektaş Kayhan

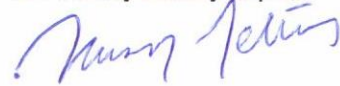

I am proud to have been nominated by the Turkish Dental Association to the FDI Science Committee this year. While I was nominated for this position, I was supported by many studies and duties at national and international level with my studies in the field of oral surgery, medicine and oral oncology, which started during my doctoral thesis.

I would like to share my knowledge and experience, especially in the prevention of cancers, control and treatment of oral side effects of treatments, with our colleagues on the international platform with the widespread influence of the world federation of dentists and work on producing new projects that can lead scientific developments.

In addition to my scientific and clinical intensive activities at the university, the deputy director of the health sciences institute and finally the vice dean, which I am still carrying out, have developed my leadership and management skills in managerial positions. Board membership in national and international scientific associations has increased my experience in the management and organization of scientific activities.

Working with the world's leading scientists for science and serving under the roof of the world dental federation is the greatest source of motivation for me. This is not a letter of application but a letter from a scientist volunteering to serve.
