Letter of Motivation

Application for Membership in the FDI Science Committee

Dear Members of the Selection Committee,

I am writing to express my keen interest in serving as a member of the FDI World Dental Federation Science Committee. As an academic and clinician in the field of Oral Medicine and Radiology, with over two decades of experience in research, teaching, and professional service, I am eager to contribute my expertise toward advancing the Committee's mission of promoting global oral health through scientific excellence and evidence-based science.

My academic and research work has focused extensively on oral cancer, oral potentially malignant disorders (OPMDs), socio-behavioral determinants of oral diseases, oral radiology, and the integration of digital technologies into dental education. Over the years, I have led and collaborated on multidisciplinary research initiatives that have generated peer-reviewed publications, fostered national and international partnerships, and produced tangible community health outcomes, particularly among underserved populations. Of particular significance has been my role as Principal Investigator in several funded research projects addressing early diagnosis, screening strategies, and educational interventions related to oral cancer and OPMDs in South Asia.

In addition to research, I have remained actively engaged in scientific communication and professional capacity building through conference presentations, workshops, and the development of educational and training programmes for healthcare professionals. I am also involved in curriculum development and serve on academic and editorial boards, where I promote the integration of current evidence into clinical and public health practice.

A central theme of my professional work has been the translation of research into meaningful practice. This commitment aligns closely with the vision of the FDI in bridging science, policy, and implementation to improve oral health outcomes globally. I would particularly welcome the opportunity to contribute to the development of scientific guidance documents, position statements, and consensus recommendations that inform and shape international oral health strategies.

It would be a privilege to collaborate with distinguished colleagues from around the world as part of the FDI Science Committee and to contribute my knowledge, experience, and dedication toward advancing this important work.

Thank you for your kind consideration of my application.
