

FDI POLICY STATEMENT

Guidelines for a Code of Ethics for Dental Publications (Print and Electronic)

**Reconfirmed by the FDI Communications & Member Support Committee in,
February 2010, Geneva, Switzerland
Revised version adopted by the General Assembly: October 2007, Dubai,
UAE
Original version adopted by the General Assembly on October 1998,
Barcelona, Spain**

The intent of the FDI Code of Ethics for Dental Publications is to provide a framework for use by Publishers, Associations and Editors.

It recognises the need for publishers to create clear and specific goals for their publications and that they draft clear terms of engagement for their editors including transparent processes for the handling of disagreements.

This Policy supports the principles and guidelines espoused by the World Association of Medical Editors and the International Committee of Medical Journal Editors.

These can be found at <http://www.wame.org/resources/publication-ethics-policies-for-medical-journals/> and <http://www.icmje.org/>.

The FDI believes refereed dental publications enhance the transfer of evidence based knowledge to the dental profession and the community.
